Rural West Product Guide

Rural West would like to take this opportunity to thank you for your interest .

If you have any questions or require further assistance, please contact

Andrew MacDonald, Chris MacDonald or Helen McGarry on (08) 9472 3488.

TERMS & CONDITIONS OF SALE

Although all effort has been taken to ensure all quoted prices are correct , prices are subject to change without notice. Please note prices listed do NOT include GST, for a GST inclusive price please add 10%

ORDERING

To place order, feel free to use the order form provided on following page and fax to Rural West. Or you can phone or E-mail your order directly to our office. Our shop is also open to Monday to Friday 8am to 5.30pm

FREIGHT

Orders can be sent via courier or post. Orders of \$200 or more, are sent freight free to any address in the Perth metro area. All other orders sent via courier will incur a \$6.00 + GST minimum charge. Postage charges will be charged as per standard Australia Post charges deemed on weight. Please note any order sent via courier or post are sent at the receivers risk. Alternatively, we are happy to send goods via receivers preferred freight company. We deliver to any Perth Metro Area Freight Depot at No Charge to the customer.

PAYMENT OPTIONS

There are a number of different payment options available including, B-Pay, Post Bill Pay, Electronic Funds Transfer (EFT), Cheque, Cash, Money Order or Credit Card (Bankcard, Mastercard, or VISA only). (Please notify Rural West of your preferred payment option when ordering). A 30 day account is also available to approved customers. Please contact Rural West if you have any queries or require further information regarding any payment option.

NEWSLETTER

Rural West also have a free monthly newsletter that can be posted or e-mailed to our customers. If you would like to subscribe to this newsletter simply contact Rural West with your details.

WHOLESALE PRICING

Rural West are happy to provide Wholesale + Bulk discounted pricing to suitable applicants. If you own a registered business, or you are a Reseller of Animal Health Products, please contact us. Rural West is structured as a Wholesale Merchant. However, we do not like to publish Wholesale or Bulk Pricing until we have spoken to the applicant.

RURAL WEST PTY. LTD.

Rural West is a small, versatile Western Australian company that specialises in the provision of animal health and nutrition products and services to the livestock industry. We have access to an extremely broad scope of options, not always available through conventional sources of supply.

- * Rural West supplies and manufactures vitamin and mineral pre-mixes, concentrates, loose licks and feed additives for all types of cattle, sheep, goat, pig, emu and ostrich enterprises. A nutrition consultant customises ruminant rations based on available feed components to make optimum use of either pasture-based or complete feeding systems. We have access to nutritionists who specialise in other areas of animal production. We are happy to refer you to a specialist nutritionist. Veterinarian or agronomist if you require a professional, comprehensive assessment of your farms nutritional needs.
- * To assist with maximum profit ration formulation, **feed analysis** is needed for energy, crude protein and dry matter content. Depending on parameters required, Rural West provides analysis through local service providers or 'Feedtest'.
- * Natural feed additives are available as an alternative to more traditional production enhancers: yeast ('Yea-Sacc 1026' strain of *Saccharomyces cerevisiae*); yucca extract ('Deoderase'); probiotics (*Lactobacillus* & *Bifidobacteria*, 'Protexin'). 'Chelated' trace minerals are readily available.
- * Rural West will custom mix all required additives into 1 bag. The farmer can then add 1 bag per 1 tonne Final Feed. This will eliminate the need to weigh individual ingredients, which usually results in loss of product from spillage. We will provide each customer with Final feed Ration, and Mixing Sheet, which limits the possibility of incorrect mixing. Every bag is labeled with all Instructions and Safety Directions.
- * Rural West manufactures electrolytes, custom medications, disinfectants, antiseptics and animal shampoos. A range of detergents is also stocked for hands, laundry and kitchen use.
- * Health products and equipment for large animal management are a specialty, hoof care, animal restraint, animal identification, dehorning equipment, castrators, obstetrical aids, trace mineral bullets, internal & external parasite control programs & products, vaccination programs, vaccines & vaccinators, syringes & needles, injectable vitamins & tonics.
- * An extensive range of small animal products is stocked including internal & external parasite controls, The '**K9 Kare**' range of flea rinses, shampoos and grooming products are an example of canine products manufactured by Rural west. We also have most popular brands of small animal treatments including, Frontline, Advantage, Proheart, Heartgard, Drontal, Repel X, Flyaway, Septicide, Calcium Sandoz, Elastoplast etc.
- * Rural West aims to deliver the optimum package to achieve the desired production outcome at a competitive price. We have experienced staff to provide sound advice on all animal health & production issues.

BULK and TRADE PRICING ALWAYS AVAILABLE.

Nutritional Stock Lick

This loose lick is designed for Sheep, Cattle or Goats. It is in a loose granular form, rather than a Lick Block. This Lick is designed to provide Vitamins, Minerals, and Trace elements, required by ruminants, especially when grazing on dry paddock feed or crop stubbles. You will notice this lick contains some protein and energy sources. However, this lick is not designed to provide protein and energy. These ingredients (Soya meal, Molasses powder, Vegetable oil) are included to increase palatability, which helps to make this lick more attractive to the stock. Because significant levels of phosphorous are provided in Cereal Grains, Hay, and Stubbles, this lick designed to be used concurrently with Cereal Grains and/or Cereal Hay. Should be made available to all animals in a trough, or ½ 44 gallon drum, or tractor tyre. Ideally, place lick in the vicinity of water trough, so animals can access lick before or after drinking each day. Make Lick available on an “add lib” basis. Lick has been designed so that Beef Cows will lick approximately 100 to 130 grams/head/day, Merino Ewes approximately 25 to 35 grams/head/day. Make available at the start of the dry feed season. If this lick is not provided until stock have been on dry feed for many weeks, animals will eat much more than above doses, for the 1st week or so. They will then settle back to these approximate doses.

All ingredients used in Rural West Premixes, Concentrates, and Licks, are purchased on Quality. Price is secondary consideration. We demand Specification Sheets, and Certificates of Analysis, on all raw materials used. We prefer to use U.S.P., or Food Grade (in preference to Fertiliser Grade) ingredients.

Ingredients used :

Dicalcium Phosphate: D.C.P. - conforms to E.E.C. Standards – contains 19% Phosphorous and 24% Calcium. High level of Bioavailability. *Note:* Phosphorous also provided by Cereal Grains, Hay, Silage + Stubbles. Calcium + Phosphorous should be in balance in Total Diet.

Gypsum: Calcium Sulphate – Highest level of Calcium Sulphate available, i.e. low level of impurities. Source of calcium and sulphur (most important if Urea is included).

Ground Limestone: Calcium Carbonate – Highest level of Calcium Carbonate available, i.e. lowest level of impurities. One of 3 different sources of Calcium contained in this Concentrate.

Salt: Sodium Chloride - Butchers Salt, or if preferred, Fine Salt. Source of Sodium. Aids palatability. Clients with high Salt content in drinking water, may request reduced levels of Salt.

Biotin: Vitamin H – deficiencies can cause Hoof, Hair (and Skin) and Horn abnormalities.

WO85 Ruminant Vitamin & Mineral Premix: made exclusively by Rural West for West. Australian conditions. “Spec Sheet” available on request. Contains Vitamins A, D3, + E. Micro Minerals – copper, cobalt, selenium, magnesium, manganese, iron, iodine, zinc.

Palabind: Dried Molasses – Increases palatability. Energy source.

Canola Meal: source of bypass protein. Increases palatability.

Vegetable Oil: for dust suppression, limits separation of ingredients, and adds energy.

Deodorase: Yucca extract, promotes nitrogen retention & reduces ammonia content in manure. *Note: optional component.*

Urea: source of non-protein nitrogen for ruminal protein synthesis. *-Note – this is an optional component.* Urea is most useful when animals are grazing high roughage diets (e.g. Cereal Crop stubbles). Care must be taken with any feed supplement containing Urea. Do not allow Feed containing Urea to get wet, especially if the water forms puddles in feed. Urea is very soluble and very toxic if stock have access to dissolved Urea.

Typical Analysis of Stock Lick – No Urea.

C. Protein	=	4.63 %	Cobalt	=	19.23 mg/kg
ME Ruminant	=	3.875 MJ/kg	Copper	=	721.15 mg/kg
Calcium	=	13.55 %	Ferrous Iron	=	1057 mg/kg
Phosphorous	=	1.81 %	Iodine	=	21.15 mg/kg
Sulphur	=	4.00 %	Selenium	=	12.42 mg/kg
Potassium	=	2213 mg/kg	Magnesium	=	2403.85 mg/kg
Vitamin A	=	240,384 IU/kg	Manganese	=	423.08 mg/kg
Vitamin D3	=	48,076 IU/kg	Zinc	=	2115.38 mg/kg
Vitamin E	=	864.55 mg/kg	Biotin	=	5.05 mg/kg

Above is one example, of many Concentrates manufactured by Rural West. Customised Rations can be supplied by our Nutritionist to suit specific requirements. Please feel free to contact Rural West for further information, without obligation.

Cattle/Sheep/Lamb Feedlot

Rural West Premixes and Concentrates are manufactured from the highest quality ingredients. Specification Sheets and Certificates of Analysis are demanded for all raw materials. U.S.P., or Food Grade, ingredients are preferred to Fertiliser Grade. The chemical analyses of all products are guaranteed.

Ingredients used:

Dicalcium Phosphate – D.C.P. contains 19% phosphorous and 25% calcium. Low temperature processing ensures the highest level of bio-availability.

Gypsum – Calcium Sulphate – Source of calcium and sulphur (important if urea is used as a source of non-protein nitrogen).

Stonedust – Calcium Carbonate – highest level of purity available. One of three sources of calcium used to balance calcium, phosphorus and sulphur levels.

Salt – Butchers Salt or, if preferred, Fine Salt. Source of Sodium. Helps maintain feed and water intake and activity of ionophores. May be reduced if stock water is saline (TDS > 3000ppm)

Urea – source of non-protein nitrogen for ruminal protein synthesis. Optional inclusion. **Note – this is an optional component**

Rumensin (Monensin) or Bovatec (Lasalocid Sodium) - Rumen modifiers are to improve feedlot efficiency, aids Coccidiosis and Acidosis prevention. Available as standard component in cattle feedlot mixes at no extra cost

Tylan - Antibiotic aids in prevention of liver abscess, and improvement in rumen digestion. **Note – this is an optional component in cattle mixes only.**

WO85 Ruminant Vit + Min. Premix – formulated exclusively by Rural West for West. Australian conditions. Contains Vitamins A, D3, + E & trace minerals – copper, cobalt, selenium, magnesium, manganese, iron, iodine, zinc (specifications available on request).

Vegetable Oil – to suppress dust, limit separation of ingredients and add energy.

Sodium Bicarbonate – a ‘buffer’ or pH stabilizer. Aids in prevention of *acidosis*, *laminitis*, *liver abscess*. Sodium Bentonite can be substituted if preferred.

Antibiotics – alternative methods of *acidosis* prevention. Antibiotics are **not included** in standard Feedlot Concentrate, but are available as an option, or supplied separately for addition to the ration as required. **Note – these are an optional component. Jan 2004: Now S4, Vet Script required!**

Note – an extra 20 kg / tonne Sodium Bicarb. or 2 kg / tonne Virginiamycin 20 (Eskalin 20) is recommended to be added to the diet during the first 2 to 3 weeks of introduction to grain. In addition, the introductory ration should undergo a *gradual* transition from high roughage to finisher ration, ideally over a 3 week period.

Deodorase – (Alltech) Yucca extract – promotes nitrogen retention + reduces ammonia content in the manure. **Note – this is an optional component.**

Yea – sacc – (Alltech). *Saccharomyces cerevisiae*. Live Yeast Culture. Stimulates ruminal micro-organisms for improved feed utilization. A natural alternative to antibiotics for control of lactic acidosis. **Note – this is an optional component.**

Typical Analysis of Final High Protein Lamb Feed :

(mixed as directed, based on feed analyses e.g. 40% Lupins, 42.5% Cereal Grain, 15% Oaten Hay, and 2.5% Rural West High Protein Lamb Feedlot Concentrate

Crude Protein	18.5%	Calcium	0.47%
Ruminant M.E.	11.8 MJ/Kg	Phosphorous	0.29%
Sodium	0.21%	Ca : P ratio	1.65

Above is one example of many Concentrates manufactured by Rural West. Customised Rations can be formulated to suit specific requirements. Please feel free to contact Rural West for further information,

RURAL WEST CUSTOM BLEND NUTRITION PRODUCTS

Rural West aim to provide information and analysis sheets on all our custom mixed, nutrition supplements. We can customise any premix or lick to suite any particular requirements. Because we manufacture product each day to fill individual orders, we can assure you our premixes will always be fresh with approximately 12 month "Best Use by Date".

All manufactured products contain the best available ingredients. Rural West Premixes and Concentrates are manufactured from the highest quality ingredients. Specification Sheets and Certificates of Analysis are demanded for all raw materials. U.S.P., or Food Grade, ingredients are preferred to Fertiliser Grade. The chemical analyses of all products are guaranteed. We are happy to provide Vendor Declarations to satisfy all Quality Assurance requirements.

Nutritional Stock Lick

Loose lick designed for sheep, cattle or goats. Designed to provide vitamins, minerals & trace elements required by ruminants, especially when grazing on dry paddock feed or crop stubbles. Available with OR without Urea.

Lick NO Urea	1 x 25kg:	\$30.00 ea
	20 x 25kg:	\$28.00 ea
	40 x 25kg:	\$26.00 ea
Lick + Urea	1 x 25kg:	\$32.00 ea
	20 x 25kg:	\$30.00 ea
	40 x 25kg:	\$28.00 ea

Cattle Feedlot

As per Spec.'s on previous page.

Use Rate: 1 bag per tonne Final Feed for Cattle

Feedlot + Urea	1 x 25kg:	\$34.00 ea
	20 x 25kg:	\$30.00 ea
	40 x 25kg:	\$28.00 ea
Feedlot NO Urea	1 x 20kg:	\$28.00 ea
	20 x 20kg:	\$26.00 ea
	40 x 20kg:	\$24.00 ea

Sheep Feedlot

As per Spec.'s on previous page.

Use Rate: 1 bag per tonne Final Feed for Sheep

Feedlot + Urea	1 x 25kg:	\$34.00 ea
	20 x 25kg:	\$30.00 ea
	40 x 25kg:	\$28.00 ea
Feedlot NO Urea	1 x 20kg:	\$28.00 ea
	20 x 20kg:	\$26.00 ea
	40 x 20kg:	\$24.00 ea

Lamb Feedlot - No Urea

As per Spec.'s on previous page.

Use Rate: 1 x 20kg bag per tonne Final Feed for Lambs

Lamb Feedlot NO Urea	1 x 20kg:	\$28.00 ea
	20 x 20kg:	\$26.00 ea
	40 x 20kg:	\$24.00 ea

W085 Ruminant Premix

Micro Vitamin & Mineral Premix for Ruminants.

Use Rate: Cattle 10g/head/day or Feedlot 1kg/1ton Final Feed

Use Rate: Sheep + Goats 1g/head/day or Feedlot 0.5kg/ton Final Feed

1 x 25kg:	\$150.00 ea
20 x 25kg :	\$146.00 ea
40 x 25kg :	\$142.00 ea

Lacgro Millpack

High Spec Micro Vitamin & Mineral Premix for Dairy Cows.

Use Rate: Dairy Cows 10g/head/day or Feedlot 1kg/1ton Final Feed

25kg:	\$225.00
--------------	-----------------

DO11 Dairy Premix

High Spec Micro Vitamin + Mineral Premix for Dairy Cows.

Use Rate: Dairy Cows 10g/head/day or Feedlot 1kg/1ton Final Feed

Contains High Levels of Copper, Cobalt + Selenium.

25kg: \$225.00

Rural West Horse Concentrate

High Spec Micro Vitamin + Mineral Premix for Equines.

Use Rate: Performance/ Racing - in Work = 60g/head/day

Pregnant Mares = 60g/head/day. Lactating Mares = 120g/head/day

Yearlings = 30 g/head/day Weanlings = 30g/head/day

20kg: \$80.00

Biotin 200 Concentrate

Biotin Premix for Horses, Pigs, Dairy & Beef Cattle. Promotes strong + supple Hoof, Hair + Horn.

Use Rate: Horses-20g/h/d. Pigs-500g/T. Cattle- g/h/d.

1kg: \$6.00
5kg: \$24.00
20kg: \$80.00

Biocal

High Spec Calcium, Amino Acids + Biotin Premix for Equine.

Use Rate: Pregnant Mares - 45-60g. Lactating Mares - 75-90g.

Yearlings and Adult Horses In Work - 60g

1kg: \$5.00
5kg: \$25.00
25kg: \$80.00

Pig Grower No. 1

High Spec Micro Vitamin + Mineral Premix for Pigs.

Use Rate: 0.75kg / 1 ton Final Feed for Grower Pigs

1kg: \$9.20
25kg: \$212.50

Vital All-Poultry

High Spec Micro Vitamin + Mineral Premix for Poultry.

Use Rate:

1kg: \$7.50
20kg: \$132.00

Unfortunately 2008 has seen Huge price increases in most Vitamins and many Minerals used in Animal Nutrition. Please check with Rural West for Current Pricing.

We stock a full range of Vitamins, available in water soluble form for drenching or adding to water supply. A range of vitamin powders also available for adding to premixes, licks, grain mixes and concentrates etc. Also available in injectable bottles and injection packs.

Vitamin E: Vitamin E as water Soluble Powder, or Liquid (ready to use) form, have been used very successfully for oral drenching of sheep and lambs, during the past couple of summers. Scouring lambs have responded extremely well to this high dose vitamin E drench. Many vets in the Southern Agricultural areas are recommending this protocol as a standard procedure in early summer. Please contact your local vet or Rural West for further details of this program

Note: A full list of vitamins is available on request.

Unfortunately 2008 has seen Huge price increases ion most Vitamins and many Minerals used in Animal Nutrition. Please check with Rural West for Current Pricing

NUTRITIONAL SUPPLEMENTS

Calfgro with Rumensin

Vitamin, Mineral & Amino Acid extender with Rumensin. Provides the essential vitamins, minerals & amino acids where levels may be low, for use in milk replacers or whole milk. Rumensin is included as an aid in the prevention of coccidiosis in calves.

15kg Bucket: \$100.00

Calfgro with Acid Pak

Provides a supply of vitamins, minerals & organic acids for use in milk replacers or whole milk to acidify & supplement diets where levels may be low

15kg Bucket: \$140.00

Calf Weanaid with Protexin

Vitamin, Mineral, Trace Element & Probiotic supplement for bucket fed & weaner calves. Contains 12 vitamins & 10 minerals and Protexin to improve growth rate and prevent scour.

10kg Bucket: \$118.00

Calf Weanaid with Protexin & Moneco

Vitamin, Mineral, Trace Element & Probiotic supplement (as above). PLUS Monensin for improved Rumen efficiency and aid to prevent coccidiosis. Complete soluble supplement for bucket fed & weaner calves.

10kg Bucket: \$118.00

Biolyte Gold

C

5lt Bucket: \$29.00
10lt Bucket: \$54.00
20lt Bucket: \$98.00

Biolyte Green

Custom mix oral rehydration solution for calves, ruminants & pigs

5lt Bucket: \$23.50
10lt Bucket: \$44.00
20lt Bucket: \$80.00

Glucalpos 4 in 1

Raises Calcium, Magnesium & Glucose levels in the blood for the treatment of milk fever.

1 x 500ml: \$7.50
24 x 500ml: \$168.00

Calmag Plus

Calcium, phosphorous, magnesium & energy supplement.
Post calving Drench.

10kg: \$21.00

Vytrate Liquid

An oral, non-antibiotic supportive treatment to replace lost fluids and electrolytes in scouring or dehydrated calves, pigs or lambs. A suitable first feed for bought-in or stressed calves and pigs. An aid in the treatment of pregnancy toxaemia in ewes.

1lt Bottle: \$15.00
5lt Bottle: \$59.00
20lt Drum: \$170.00

Hydrate Liquid

Nonantibiotic supportive treatment and treatment of scours due to nutritional, bacterial or viral causes in calves, pigs and lambs. Also an aid in the treatment of pregnancy toxaemia in ewes.

2lt Bottle: \$21.50

Mega-Lyte Plus

Aid in the treatment of scours in calves and replacement of lost body fluids and correction of the electrolyte imbalance and supply of energy.

2kg Bucket: \$55.00

Ceton

For treatment of pregnancy toxaemia in sheep and acetonaemia in cattle. To be given orally as a drench or mixed with feed

2.5lt Bottle: \$29.00

Propylene Glycol

Treatment of Ketosis/Acetonaemia in Cattle. Give orally as a drench, in feed or water

1lt Bottle: \$7.50
5lt Bottle: \$30.00
20lt Cube: \$90.00

Palastart Calf Milk Replacer

Premium quality 'all dairy' calf milk replacer, manufactured from milk powders & soluble molasses powder. Free flowing, exhibits excellent solubility & contains no tallow or fat substitutes.

Blue 20kg: \$82.00
Green Premium 20kg: \$90.00

Palastart Lamb & Kid Milk Replacer

Free flowing blend of milk powder with a specially formulated Vitamin and Mineral mix

10kg Bag: \$50.00

Di-Vetelact

Low lactose animal milk replacement. Can be used in powder or liquid form.

1kg Bag:	\$16.00
5kg Bag:	\$68.00
20kg Bag:	\$275.00

Vigest

General vitamin & mineral tonic & appetite stimulant. For use in the treatment of orphaned, premature or weak animals. May be given in conjunction with electrolytes to treat scours.

500ml Bottle:	\$11.50
2lt Bottle:	\$26.00

Protexin

Soluble concentrated Multi-Strain Probiotic for animals & birds. Improves intestinal microbial balance by maintaining the digestive system, optimising digestion of feed and naturally enhancing health.

125gm Powder:	\$32.00
1kg Powder:	\$69.00
125gm Soluble Powder:	\$44.00
250gm Soluble Powder:	\$65.00
500gm Soluble Powder:	\$95.00
1lt Liquid:	\$159.00

Selpor Selenium Pour On

A selenium supplement for cattle in selenium deficient areas

2.5lt Bottle:	\$190.00

BRAND NAME FEED ADDITIVES

Elanco Rumensin 100

Monensin sodium 100g/kg Indications: Feedlot Cattle: Improved feed efficiency, aid in the control of bloat. Dairy Cattle: Increased milk production under many conditions, aid in reducing the severity of nonclinical ketosis in lactating dairy cows,. Cattle: Improved weight gain, feed efficiency & reproductive performance in heifers

25kg: \$240.00

IAH Moneco 100

Monensin sodium 100g/kg Indications: Feedlot Cattle: Improved feed efficiency, aid in the control of bloat. Dairy Cattle: Increased milk production under many conditions, aid in reducing the severity of nonclinical ketosis in lactating dairy cows,. Cattle: Improved weight gain, feed efficiency & reproductive performance in heifers

1kg: \$10.00
25kg: \$229.00

Elanco Tylan 50

Tylosin phosphate 50g/kg. Growth stimulant, improves feed conversion efficiency in pigs. Prevention of Ileitis. Reduction of incidence of liver abscess in cattle.

20kg: \$290.00

IAH Flaveco

Flavophospholipol 5g/kg. Improves productivity by stimulating the growth and increasing feed conversion efficiency in poultry, pigs, calves and cattle and increasing egg production in laying hens

25kg: \$212.50

Novus Koxisan 120

25kg: \$325.00

Alpharma Bovatec 150

Lasalocid sodium 150g/kg. Improve liveweight gains & feed conversion in growing cattle & lot fed beef cattle; aid in the improvement of milk production by dairy cows fed high protein grass pastures & by lot fed dairy cattle.

20kg: \$255.00

Zinpro Availa Zinc

Zinc amino acid complex

1kg: \$12.00
25kg: \$250.00

Zinpro Availa 4

Zinc amino acid complex containing zinc 5.06%, copper & manganese amino acid complexes plus cobalt glucoheptonate complex. Improves hoof integrity, cow locomotion, hoof hardness & reduce hoof infections.

20kg: \$230.00

Alltech Bioplex Zinc

Zinc 150g/kg. A chelated trace mineral proteinate for livestock feeds. Helps promote hoof structure integrity.

1kg: \$16.50
25kg: \$393.75

Alltech Yea-Sacc

Saccharomyces cerevisiae 5 x 10⁹ cells/g minimum. Dried yeast culture for use in premixes, or as a supplement in complete livestock & poultry feed.

1kg: \$18.00
25kg: \$400.00

Wesfeeds Springer Pellets

1 x 25kg: \$21.00
40 x 25kg: \$820.00

Wesfeeds Calf Pellets Ultragro

High protein supplement suitable for feeding to calves from 4 days old. Contains high quality protein sources & provides essential amino acids, trace minerals & vitamins for optimum growth. Feeding of grain diets to young calves aids in rumen development. Can also improve feed conversion efficiency & coccidiosis control.

1 x 25kg: \$19.50
40 x 25kg: \$720.00

Wesfeeds Feedlot Cubes

Complete feedlot ration containing all necessary energy, protein, fibre, minerals, trace elements & vitamins for rapid growth & finishing of young stock. Also contains a fermentation modifier for improved feed conversion efficiency. No additional roughage needs to be fed with this ration.

1 x 25kg: \$11.50
40 x 25kg: \$420.00

Alltech Acid Pak

Enterococcus faecium 10⁵ CFU/g (minimum) Lactobacillus acidophilus 10⁵ CFU/g (minimum) also contains sodium, potassium, amylase & protease. An organic acidifying water soluble supply of electrolytes, enzymes & natural lactic acid producing bacteria.

1kg: \$42.00
20kg: \$780.00

Alltech Sil-All

Silage inoculant. Supplies one million bacteria/gram of forage to dominate the fermentation and ensure rapid preservation

20kg: \$239.00
250gm Soluble Sachet: \$65.00

DAIRY CHEMICALS
